

Printable sticker size chart

Print this page at 100 percent scale (do not select "fit to page"), then hold a shape against your product to check the size before you order.

A 5 inch square and a 5 inch circle do not fit beside the rest on letter paper. To check that size, measure 5 inches along the edge of this sheet: the 4 inch square plus 1 inch of the gap next to it is exactly 5 inches.
